

Vacancy: Project Assembly / Installation Engineer
Company: Sempro Technologies BV
Location: Nijmegen, The Netherlands
Industry: Semiconductor/Machine building

About Sempro Technologies

Sempro Technologies BV is a fast growing OEM equipment supplier that develops, supplies and services trim & form equipment for semiconductors. Sempro's equipment and solutions play an important role in the roadmap towards cost leadership at our customer assembly sites around the world. Within the Power Product-segment, Sempro is in the top three of world leaders. The Sempro Product Support, Service and Engineering teams are stationed in the Netherlands, Malaysia and China. The current organization consists of about 40FTE and we are planning to continuously grow to stay ahead in the market.

Why work as a Project Assembly / Installation Engineer at Sempro?

- Work for a great company with competitive solutions in the semicon industry
- Work for great costumers
- It will be a big adventure
- You can make the difference for Sempro
- You can grow with the company

The Job

As a Project Assembly / Installation Engineer at Sempro, your job is to assemble, install and debug Sempro machines from the Sempro site in Nijmegen as well as on-site at our customers' locations all over the world. On average you will be working at customer sites abroad for about 40% of your time.

Key responsibilities

- Adjusting, testing and commissioning various machines
- Installing and debugging machines and machine parks

Your qualifications

You have at least completed a secondary vocational or college education in Mechatronics, Electrical Engineering, Mechanical Engineering, Middle Management Engineering, General Operational Engineering) or an equivalent program.

You are an all-round professional with knowledge of mechatronics, mechanics and electrical engineering (machine building in general). You have knowledge of and experience with the assembly and installation of machines. You are willing to further develop yourself through courses and/or training.

Moreover, you have strong communication skills and you always appear in a representative manner.

What we offer

- Salary in line with market conditions
- 20 + 5 vacation days
- 8% holiday pay
- Sempro pension scheme
- Bonus scheme.
- Travel allowance
- Flexible working hours
- The work is varied
- Partly working from home possible
- Budget for training
