

**Vacancy:** Project Assembly Installation Engineer  
**Company:** Sempro (The Netherlands/Nijmegen)  
**Industry:** Semiconductor/Machine building

Sempro Technologies BV is fast growing OEM equipment supplier, develops, supplies and services for trim&form equipment for semiconductors. Sempro equipment and solutions play an important role in the roadmap towards cost leadership at our customer assembly sites around the world. Within the Power product segment Sempro is in the top three of world leaders. The Sempro Product Support, Service and Engineering teams are in Netherlands, Malaysia and China. The current organization consist of about 40FTE and planning to continuously grow to stay ahead in the market.

### **Why work as a Installation Project Assembly Engineer at Sempro**

- Work for a great company with competitive solutions in the semicon industry
- Work for great costumers
- It will be a big adventure...☺
- You can make the difference for Sempro
- You can grow with the company

### **The Job**

You will work in assembly, installing and debugging of Sempro machines at the customer's locations worldwide and the Sempro site in Nijmegen.

Sempro is in full development and invests in its employees and in the development of its processes and machines. The position of Installation Engineer is a long term job.

As an Installation engineer you work on adjusting, testing and commissioning various machines. You are a real technician. Installing debugging machines and machine parks is what you like to do. You have both mechanical and electrical knowledge.

As an Installation Engineer you are an all-round professional with knowledge of mechatronics, mechanics end electrical engineering (machine building in general). Furthermore, it is no problem for you to travel internationally, that can be anywhere in the world! You are open to further develop yourself. It is a varied job and the techniques are constantly changing!

On average you are at the customer site 40% of your working time.

### **Your qualifications:**

- You have at least completed an MBO 4 or HBO course in Mechatronics, Electrical Engineering, Mechanical Engineering (WTB), Middle Management Engineering, AOT (General Operational Engineering) or equivalent at MBO level 4
- You have knowledge of and experience with the assembly and installion of machines
- You are willing to further develop yourself through courses and/or training;
- You have good social/communication skills.
- You representative, you are always "Ambassador" of the company at the location you visit

### **Conditions**

Salary and Bonus is in line with market conditions
